-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 February 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/27/06 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 19-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because it is not what structure is required. The claims recite intended use of the claimed parts of the apparatus, but fail to provide the structure required or structural cooperation between the recited parts.

It is noted that the claims are not written as "means-plus-function".

Claims 19, 21(19), 22(19) and 24-28(19) are also indefinite because it is not clear what is referenced as "speed difference on substrate".

Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 19-22 and 24-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Hillman (US Patent No 6,059,888)

Hillman teaches an apparatus as claimed. See entire document, especially Figures 1, 3 and 11 and the related description.

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hillman.

Hillman teaches an apparatus as claimed except for the specific recitation of a sensor to determine the presence of the substrate.

The semiconductor wafer processing technology is highly automated and precise technology it would have been obvious to an ordinary artisan at the time the invention was made to control all the processing steps of the substrate treatment and thereby it would have been obvious to an ordinary artisan at the time the invention was made to provide sensor in the apparatus of Hillman to enable the automation of the production.

It has been held that broadly providing a mechanical or automatic means to replace manual activity, which has accomplished the same result, involves only routine skill in the art. In re Venner, 120 USPQ 192.

Response to Arguments

8. Applicant's arguments with respect to newly submitted claims 19-28 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 6,290,780 is cited to show the state of the prior art with respect to cleaning substrates.
